

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: November 23, 2010

Water Body Under Evaluation:

Water Body ID #: 2170  
Name: Shaw Branch (Class C)  
Length of Segment: 1.2 miles  
County (ies): St. Francois

Use Attainability Analysis (UAA) Study:

UAA ID #: 1284  
Submitter: Olsson Associates  
Date(s) Conducted: August 18, 2008  
Date Received: October 14, 2008  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and there were no WBCR observed. There were multiple sightings of ATV and dirt bike paths at all survey locations, also it was noted that there were footprints and foot paths near site #3. There were no interviews conducted during the 2008 UAA.

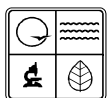

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the maximum depth for WBCR at any location and in fact was dry at almost every location during the survey. No interviews were conducted in 2008 and no previous UAA have been done. Since there was evidence of SCR use, the committee recommends WBCR be removed and SCR be added.

**Committee Recommendation:**

- ☐ Add Use ☐ Retain Use ☒ Remove Use
- ☐ Modify Use ☐ Inconclusive
